## Summary

---

I am a results-oriented web developer specializing in React with a passion for exploring new technologies. Proficient in building dynamic and responsive web applications using React, CSS, HTML, and JavaScript. Experienced in implementing secure Firebase authentication. Possess beginner-level expertise in Express.js and MongoDB for server-side development. Quick learner and adaptable professional dedicated to delivering high-quality code and exceptional user experiences.

## Skills

---

### Technical

**Proficient:** React, HTML & CSS

**Intermediate:** JavaScript, Bootstrap, Tailwind CSS, Firebase, Ms Office, G-Suite.

**Beginner:** MongoDB, Node Js, Express Js, Java, Python

### Non Technical

Leadership, Team Work, Presentation, Time Management, Communication

## Projects

---

### Kitchen Champ

[Demo](#) | [Code](#)

Technology used: React, JavaScript, MongoDB, Firebase, Node js, Tailwind CSS

- The website has three user roles: Admin, Instructor, and Students, Admin having exclusive role modification privileges.
- Logged-in users access personalized dashboards secured by private routes, JWT authentication, and middleware functions..
- Students use Stripe to pay fees. Instructors add courses. Admins approve or deny instructor-added courses.

### Sheldor Train World

[Demo](#) | [Code](#)

Technology used: React, JavaScript, MongoDB, Firebase, Node js, Tailwind CSS

- Database integration with MongoDB enables CRUD operations, while Firebase handles authentication
- Backend integrates price sorting, private/protected routes, and empowers toy sellers to add, edit, and delete information.
- The website showcases added toys, offering a comprehensive system to manage listings for seamless user experiences.

### Bangladeshi Canteen

[Demo](#) | [Code](#)

Technology used: React, JavaScript, Firebase, Node js, React Bootstrap

- Dynamic interface combining React and Bootstrap, with multiple Firebase login methods and Node.js/Express.js backend
- Features include dynamic routing, active link indication, loading spinner, and a custom 404 page..
- The project leverages React, Bootstrap, Firebase, Node.js, and Express.js to deliver a robust, user-friendly application with seamless login options..

## Projects

---

### Portfolio

[Demo](#) | [Code](#)

Technology used: React, JavaScript, Tailwind CSS

- React-based front-end project with Tailwind CSS and daisy UI component library, and it is made fully responsive..
- Sections include About Me, Resume (with tabs for skills, projects, education, extracurriculars), and Message..
- Enables visitors to send messages via the website, delivered using Email JS integration, react tparticles used in the banner.

## Education

---

### BSc in Computer Science and Engineering

BRAC University,  
Dhaka, Bangladesh  
CGPA: 3.63/4
